Hygiene

NIGHT TIME ECONOMY  
SOLUTIONS

# Hygiene and Cleaning

The Coronavirus can live for hours, to days, on surfaces like toilet cubicles, WCs, washbasins, hand-dryers, and entrance door handles. How long it survives depends on the material the surface is made from

- Metal: Five days
- Wood: Four days
- Stainless Steel: Two to three days
- Copper: Four hours
- Glass mirrors and windows: Up to five days
- Ceramics WCs and washbasins: Five days

# Hygiene and Cleaning

- Check chemicals to ensure they eliminate viruses and ensure contact times for chemicals are met.
- Use contracted cleaners for deep cleaning
- Consider laundering staff uniforms – over 65 degree wash
- Provide the correct PPE for cleaning including disposable gloves, aprons and cloths when needed
- Ensure staff know how to use cleaning products safely (COSHH, HACCP) – implement refresher training policies.
- Ensure staff wash hands properly and frequently.
- Provide essentials to proper hand cleaning (warm + cold water, anti bac soap, paper towels).
- Implement FOH hand washing stations
- It is crucial to make cleaning highly visible to reassure customers. This is no longer something to do out of sight. Place cleaning records in plain sight (88.3% people want to see it)

# Toilets

NIGHT TIME ECONOMY  
SOLUTIONS

# Toilets

Every time someone flushes, a “toilet plume” of droplets explodes into the air, coating the surrounding area which can be breathed in and ingested by nearby parties a “plume” can travel six feet in every direction

COVID-19 has been found in human poo, up to 33 days after infected people have recovered and tested negative for the virus.

- Adding lids to public toilets
- Closing off every other stall or urinal if they're too tightly packed together
- No door handles (kick or foot hook entry)
- Wear masks
